ASTRONAUTICS AND AERONAUTICS, 1968: CHRONOLOGY ON SCIENCE, TECHNOLOGY, AND POLICY (PAPERBACK)

[DOWNLOAD PDF](#)

Createspace Independent Publishing Platform, United States, 2014. Paperback. Condition: New. Language: English. Brand new Book. How the voyage of Apollo 11 came to pass after seven years of concerted national effort will occupy the serious attention of competent historians for years to come. The moon walk of Astronauts Armstrong and Aldrin was an important achievement in the progress of man. This dramatic event was shared on live television by half a billion people around our small planet, involving the entire globe in a unique common historical event of all mankind. New questions concerning the place of man in the universe have been raised, which should stimulate inquiry into the philosophical aspects of space travel as well as the scientific, engineering, and organizational aspects. For such studies it is hoped that this chronology of the space events of the notable year of 1968 will be of high reference value. The year preceding man's first landing and initial exploration of an extraterrestrial body was also the 11th year since Sputnik became the first manmade object lofted into earth orbit and the 10th anniversary of the creation of the U.S. National Aeronautics and Space Administration. For NASA it witnessed the conclusion of the great leadership of its second Administrator, James E. Webb, who organized and carried forward so vigorously America's effort to undertake a manned lunar landing in the decade of the 1960's. Two historic space flights in the final months of 1968 put the work for which he had been responsible to the final test: Apollo 7, the first manned Apollo flight, and Apollo 8, man's first trip from earth into orbit around another celestial body. After an 18-month hiatus in manned space flight, both flights were carried out flawlessly. Other notable techno-scientific space triumphs were made in 1968, including the launching...
